Presentation Ratings

How would you rate the content and educational value of the presentations?

Event Rating

Delegate Gains and Changes

What have you gained as a result of attending this event?	As a result of attending this event would you say your practice will change?
Increased knowledge	Yes  12
good networking opportunity. Update from colleagues in London and elsewhere opportunity to meet nursing and medical colleagues from elsewhere	No  5
Good update on the discussed topics	N/A  7
Update my information about management of newborn of +ve HIV mothers	If so, please state why?
good networking event and chance to update knowledge and also learn new things	Yes Have more knowledge now to discuss with patients.
Understanding and awareness of PID HSCT transplantation processes and uncertainties.	Yes I think it will help influence others to change
Useful to see adult cases being considered for HSCT	Yes The advance in the management of HIV in during pregnancy and the close observation of the pregnant women makes the possibility of newborn infections year after year .
Excellent programme.	Yes Awareness of referral pathways and national MDT arrangements for adult PID transplantation.
appreciation of interconnectedness of infection specialties; CPD, better idea of BBV management in pregnancy and children	Yes better idea of BBV management in pregnancy and children
Excellent clinical discussion on challenging cases. Good opportunity for networked collaboration across colleagues in Scotland	Yes Approach to thinking about BMT in adults with complex PID.
the value of networking with colleagues. Updates for practice.	Yes A prompt to look at the websites and check for updates so same can be utilised in clinic setting.
As I'm new in post it was helpful to put faces to names and gain an insight into their roles. Discussing the transplant cases was very helpful and informative and was great to share up to date knowledge with the team	Yes Updated advice on HIV management in newborns.
Up to date HIV guidelines and discussion around this really helpful.	Yes Around the new HIV guidelines (and around breastfeeding)
Much more awareness of HIV in pregnancy and in neonates.	Yes I'll be more mindful checking lymphocyte count
An update onto management of topics I rarely have the opportunity to see in clinical practice.	No Validation we are doing things correctly
Very useful updates on relevant subjects	No My practice as a trainee is guided by seniors but this does help me be more aware of the issues we are dealing with.
	N/A Prof Burns excellent - really good forum in which to 'make use' of her expertise.

The Future and General Comments

Are there any topics you would like to see included in future events?

Hereditary Angioedema
Adult CGD

Immunization of immunocompromised children

More adult immunology topics

Syphilis update

Was nice to have a nursing presentation

Are there any areas in which you would like to get involved with SPAIIN?

BMT pathway for adults with PID (previous involvement, but this has not been progressed for some time)

presenting interesting cases

Prevention of HCV, HBV, HIV

Yes please- to continue to be involved!

Are there any topics/information you would like to see added to the SPAIIN website? www.spaiin.scot.nhs.uk

Immunisation for immunocompromised children

Do you have any general comments about the event?

Adult transplant session, although interesting, was not very relevant at a paediatric study day.

Agenda was a nice mix with interesting thought provoking subjects

Excellent - well done to the organisers

It was just very cold.

Thank you, great range of speakers

There were certain points when the programme was very specialist (as it should be) which made it difficult to follow as an ST5 with limited exposure to Infectious Disease.

Very good meeting

very well received

Well organised, well hosted and well delivered.
